Maxcraft Avionics Announces STC for Class A TAWS with Enhanced Altitude Accuracy for Hawker Beechcraft 1900C and 1900D Regional Airliners

Vancouver, BC, December 2012, Maxcraft Avionics Ltd., an established Avionics company located on Pitt Meadows Airport near Vancouver, B.C., have announced they have received Transport Canada Supplemental Type Certificate (STC) SA12-78 for installation of a Class A Terrain Awareness Warning System (TAWS) into the Hawker Beechcraft 1900C and 1900D aircraft.

The Maxcraft solution also meets the new Transport Canada requirements for Enhanced Altitude Accuracy (EAA) as referenced in the Transport Canada Advisory Circular for (TAWS) AC 600-003.

This approved solution offers the Sandel ST3400 TAWS Class A display, integrated with existing compatible GPS receivers such as the Garmin GNS400()/500() and GTN6XX/7XX Series Navigators, or can provide a new dedicated WAAS/GPS Sensor, if required. Existing dedicated and compatible Air Data Sensors from existing GPWS systems may be retained when viable, or replaced with a dedicated Sandia Aerospace SAC 7-35.

This STC offers two approved configurations:

- 1) RMI replacement
- 2) TCAS control display replacement

Maxcraft president, Daryl MacIntosh, stated "this is an ideal cost effective solution for Canadian 1900C/D operators which not only meets current regulatory requirements, but also eliminates the risk/expense of future compliance costs for enhanced altitude accuracy by 2017".

About Maxcraft Avionics Ltd.

Maxcraft is a Canadian owned company that does avionics installation work around the world. It was founded in 1989 to originally address a need for competent avionics support services in the helicopter industry. The customer base grew over the years to include operators of all types of aircraft including private, commercial, business, charter, corporate, airline, police, military and air ambulance. With state-of-the-art shop facilities they provide full service support to the private and commercial fixed wing market as well as the helicopter sector. Maxcraft Avionics can be found on the web at www.maxcraft.ca or may be reached at 604-465-3080.
